## EVERPURE® CARTRIDGE TRACKING SYSTEM (ECTS)

This proprietary, online database program was developed to help dealers organize information about their customer's cartridges when monitoring service calls and scheduling cartridge changes. It allows viewing of current cartridge tracking details and generates lists alerting you when cartridges need changing. With ECTS, you never miss an opportunity to offer great service.

## WATER TESTING & ANALYSIS

### EVERPURE SMARTWORKS<sup>SM</sup>

It's smart to know what's in the water. The SMARTWORKS program offers everything you need to grow your water filter sales using such information. The program centers around:

- An easy-to-use water test kit
- A custom water analysis to help foodservice operators better understand their water quality
- A tailored product recommendation – the right solution to ensure the operator has premium water to serve, and equipment that operates in peak condition

Get started by ordering the water testing products below. Please visit [foodservice.pentair.com](http://foodservice.pentair.com) for more information.

## FOODSERVICE WATER SPECIFICATIONS

Quality water is important for taste, brewing, carbonation, steaming, equipment protection and more. Water used to make coffee, espresso beverages, fountain beverages, drinking water and ice must be potable under local requirements and USEPA

drinking water standards. It is also recommended that water quality meets the attributes specified in the following table by food service application:

APPLICATION	ATTRIBUTE	SPECIFICATION
Coffee and Espresso	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	Not more than 100 ppm
	Total Hardness	17 - 85 ppm
	Total Dissolved Solids	70 - 200 ppm
	pH	6.80 - 7.40
	Sodium	At or near 10 mg/l
Fountain and Drinking Water	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.30 mg/l
	Total Alkalinity	Not more than 150 mg/l
	Total Hardness	Not more than 100 mg/l
	Total Dissolved Solids	Not more than 500 mg/l
	Sulfates	Not more than 250 mg/l
	Chlorides	Not more than 250 mg/l
pH	6.50 - 8.50	
Ice	Turbidity	Must not exceed 0.5 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	<150 ppm
	Total Hardness	<85 ppm
	Total Dissolved Solids	70 - 200 ppm
	pH	6.80 - 7.40
	Chlorides	80 ppm

Water used on inlets to steamers or warewashers should meet quality requirements as specified by the equipment's manufacturer or as listed in the following table:

APPLICATION	ATTRIBUTE	SPECIFICATION
Steam	Turbidity	Must not exceed 0.50 Nephelometric Turbidity Units
	Taste & Odor	Free from off-tastes and odors
	Total Chlorine	<0.05 ppm
	Iron	Not more than 0.25 ppm
	Total Alkalinity	Not more than 100 ppm
	Total Hardness	17 - 85 ppm
	Total Dissolved Solids	25 - 75 ppm
	pH	6.80 - 7.40
	Chlorides	30 ppm

## COFFEE AND TEA ARE 98% WATER

### Everpure® filters by Pentair® reduce:

- Abrasion and clogging
- Scale buildup and corrosion
- Off-tastes and odors
- Harmful cysts by mechanical means\*

### The benefits of Everpure filtration:

- Consistent quality, better tasting coffee
- Less equipment downtime and lower energy costs
- Lower maintenance and equipment costs, and lower total cost of ownership
- Satisfied customers and increased profits

## EVERPURE COFFEE FILTRATION SYSTEMS

- NSF certifications
- 1/2 micron precoat filtration by mechanical means\* with scale control
- Chlorine, taste & odor and sediment reduction
- Harmful cyst reduction by mechanical means\*
- Proprietary Micro-Pure® II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life\*

**System sizing guidelines:** Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions may produce different results.

## EVERPURE® SOFTENING, FILTERING & BUFFERING ESPRESSO SYSTEMS

### Everpure ESO and Claris™ Ultra System comparison:

- Both feature saltless ion exchange (softening) and integrated carbon filtration
- Both provide excellent scale prevention, improved taste and odor for beverages, and blending of filtered water with the softened water
- The ESO has a fixed blend of about 40% of filtered water while the Claris Ultra has an adjustable blend that allows customization of how much mineral content you want in the product water
- Blending optimizes mineral content

## EVERPURE® claris™ FILTRATION SYSTEMS

The Everpure Claris System has been specifically developed to remove a range of contaminants from the water, such as particles or unwanted taste & odor in hot drinks to minimize operation costs. Using unique water purification and softening technology, these systems are also able to effectively combine hardness reduction, mineral stabilization and corrosion

inhibition by maintaining a controlled low carbonic acid level in the water.

### Everpure Claris used for iced tea

The perfect solution for cloudy iced tea! After a foodservice chain installed the Claris Ultra L System, the look and taste of their iced tea improved dramatically.

**Before installation of Claris Ultra L System.**

**After installation of Claris Ultra L System.**

Adjustable DuoBlend bypass valve allows for precise adjustment of carbonate hardness

Built-in flush valve and backflow preventer

Automatic inlet and outlet shutoff valves mean no risk of opening head and having water run everywhere

System operates in either a vertical or horizontal orientation

"Valve-in-head" design allows the system to depressurize by itself during cartridge changeout

Universal filter head fits all Claris cartridge models and sizes

Quick to install, easy to handle, fast to service

- Flat cartridge connector allows filter replacement in limited space
- Prefiltration removes coarse particles
- Carbonate hardness is adjusted through an ion exchange process

## FOUNTAIN BEVERAGES ARE 83% WATER

### Everpure® filters by Pentair® reduce:

- Abrasion and clogging from dirt
- Chlorine, taste & odor and other contaminants
- Harmful cysts by mechanical means\*
- Chloramines – CLM+ Systems

### The benefits of Everpure filtration:

- Consistent beverage quality
- Less equipment downtime, lower maintenance costs and lower total cost of ownership
- Bottled water quality, taste and appeal
- Satisfied customers and increased profits

## EVERPURE FOUNTAIN BEVERAGE FILTRATION SYSTEMS

### System features include:

- NSF certifications
- Manifold has inlet water shutoff valve with optional integrated sediment prefilter, flushing valve and water pressure gauge(s)
- Harmful cyst reduction by mechanical means\*
- Chloramines, chlorine, taste & odor and sediment reduction

- 1/2 micron filtration by mechanical means\*, featuring Micro-Pure® II or Fibredyne™ filter media that can decrease product life\*

### Ambient carbonation versus cold carbonation:

- If a carbonator is placed before the water is chilled using a cold plate, the associated term is ambient carbonation. When it is placed post-chilling, it is cold carbonation. Water that is cold absorbs CO<sub>2</sub> better so drinks will have more fizz.

### System sizing guidelines:

Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

## WHAT YOU SHOULD KNOW ABOUT CHLORAMINES

### What are chloramines?

- Chloramines are a combination of chlorine and ammonia, and are used as a disinfectant to treat drinking water as an alternative to chlorine

### Why chloramines versus chlorine treatment?

- Chloramines provide longer-lasting water treatment as water moves through distribution systems to end-users
- Due to stricter government regulation, specifically the USEPA's Stage 2 Disinfectant Byproduct Rules, many US municipalities are switching from chlorine disinfection to chloramines disinfection

Chlorine + Ammonia = Chloramines

Chloramines is chlorine bonded with ammonia. This provides more stability for better disinfection over long distances in pipe lines. It lasts two or three days instead of just a few hours for free chlorine. Also, because it's less likely to create byproducts such as THMs, it helps municipalities meet new EPA guidelines for drinking water quality.

## EVERPURE® QC7I DIO PLATFORM WITH CLM+/7SI

- Integrated header design incorporates two independent systems, CLM+ Triple and 7SI Twin Systems, into a single configuration
- Solution provides two distinct water qualities for multiple applications: primary filtration for fountain and secondary filtration with scale inhibitor for ice
- Small system footprint is easy to install and service with built-in water shut-off and flushing valves on both water outlets

### System features include:

- Harmful cyst reduction by mechanical means\*†
- NSF 42 and 53 certifications
- CLM+ Primary System:
  - Reduces chloramines, chlorine taste & odor and other offensive contaminants that can adversely affect the taste of beverages
  - Improves the taste of fountain beverages and helps retain carbonation
- 7SI Secondary System:
  - Reduces water-related ice machine problems caused by scale buildup from dirt and dissolved minerals\*
  - Self-contained scale inhibitor feed keeps ice machines functioning at full capacity\*

Other system configurations are available by combining the QC7I DIO Manifold with desired Pentair® Everpure cartridges. Consult your dealer or Pentair Everpure Technical Support for more information.

## SHURFLO® WATER BOOST SYSTEMS

- As foodservice establishments continue to expand their beverage offerings, the increased water usage can adversely impact operational performance
- This, coupled with fluctuating city water flow and pressure, can lead to inconsistent drink quality, poor beverage dispenser performance and premature exhaustion of filters

## SHURFLO WATER PRESSURE REDUCER VALVES (WPRV)

Shurflo Water Pressure Reducer Valves (WPRV) are fixed pressure, water-reducing devices (non-adjustable). The WPRV minimizes incoming water

pressure fluctuations while guarding against pressure spikes. Actual pressure reduction is dependent upon input pressure and outlet flow rate.

## ELECTRIC DELIVERY PUMP

High-flow, low-pressure pump ideally suited for beverage and water applications.

- Self-priming up to 12.0 vertical lift feet [3.7 m]
- Used in delivery and transfer applications up to 3.0 gpm [11.4 Lpm]
- Built-in check valve (may vary by model) prevents backflow of fluid
- Automatic turn on/shutoff
- Can run dry without damage
- UL/CSA-recognized components

## 70% OF SERVICE CALLS ARE WATER-RELATED

### Everpure® filters by Pentair® reduce:

- Abrasion and clogging
- Scale buildup and corrosion
- Off-tastes and odors
- Harmful cysts by mechanical means\*
- Particulates that result in cloudy ice

### The benefits of Everpure filtration:

- Best quality ice possible
- Less equipment downtime, lower maintenance costs and lower total cost of ownership
- Satisfied customers and increased profits

## EVERPURE ICE FILTRATION SYSTEMS

### System features include:

- NSF certifications
- Manifold has inlet water shutoff valve with optional integrated sediment prefilter, flushing valve and water pressure gauge(s)
- Chlorine, taste & odor and sediment reduction
- Harmful cyst reduction by mechanical means\*
- 1/2 micron filtration by mechanical means\*
- Scale control
- Proprietary Everpure Micro-Pure® II filter media that can decrease product life\*
- Featuring proprietary Fibredyne™ media technology

**System sizing guidelines:** Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

### EVERPURE 4SI AND 7SI CARTRIDGES

- Carbonless design allows chlorine to pass through which can help to reduce slime and bacteria growth inside the ice machine and ice bin
- Specially designed for ice machines
- Reduces sediment and particulate down to 1/2 micron by mechanical means\*\*
- Reduce harmful cysts such as *Cryptosporidium* and *Giardia* by mechanical means\*\*
- Ideal for foodservice operations where baking of breads and pastries is done on-site

Everpure SI Cartridges, which are designed to help prevent bacteria from entering or reproducing within a hospital water systems's POU ice making applications, can help healthcare facilities comply with ASHRAE 188-2015.

## STEAM IS 100% WATER

### Everpure® filters by Pentair® reduce:

- Abrasion and clogging
- Scale buildup and corrosion

See individual system specifications for performance claims.

### The benefits of Everpure filtration:

- Fewer delimitings
- Equipment lasts longer
- Less equipment downtime, and lower maintenance and energy costs
- Satisfied operators and increased profits

## EVERPURE claris™ | prime SYSTEM SIZING

**System sizing guidelines:** Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

## EVERPURE® claris™ | prime

Everpure Claris Prime by Pentair® is an innovative, quick-change, saltless softening (ion exchange) and filtration system that prevents scale and removes contaminants. Even more unique is its ability to allow you to tailor the hardness to match your specific needs.

### Claris Technology offers:

- Softens without salt
- Removes particles AND chemicals
- Requires no electricity or drain
- No additives to water
- Effective hardness removal
- Prevents clogged drains
- Reduces metal corrosion
- No wasted water
- NSF 42-certified cartridge
- Claris 5-stage filtration process offers:
  - Prefiltration
  - Carbonate hardness adjustment
  - Fine filtration
  - Highly efficient carbon block removes harmful contaminants and unpleasant tastes and odors
  - Solid membrane filter removes particles down to 5 microns for high levels of equipment protection

### Claris Prime Technology offers all the benefits of the standard Claris Technology plus the following:

- Claris Prime can be applied for water that contains 30-100 ppm of corrosive salts. For levels above that use a RO system see page 40
- Both TDS reduction and corrosion inhibition
- Mineral hardness and anion reduction
- Tailored adjustment of TDS reduction, Cl and SO<sub>4</sub> levels

- Helps prevent mineral scale from accumulating inside ice machines and coffee brewers, reducing potential performance issues and downtime, and extending the life of the equipment
- Controls scale formation to extend membrane life in reverse osmosis systems
- Adds an additional scale inhibitor to the Everpure Endurance® High Flow System, for when there are multiple ice machines on location
- 2SR-BW Endurance Feeder Kit to be used with the Everpure Endurance High Flow System
- 2SR-BW QL2 General Purpose Feeder Kit to be used with any Everpure High Flow System
- Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination
- Estimated one (1) year of scale protection

## EVERPURE SR-X SCALE INHIBITOR SYSTEM

SR-X Scale Inhibitor Feeder

SS-10

SS-XL

Right Wing Bracket Assembly (allows for easy retrofitting of SR-X system to right side of multiple head systems manufactured 9/1/2003 to present)

- Inhibits limescale buildup by dispensing a controlled amount of Hydroblend™ compound, ideal for high temperature locations
- Provides more consistent feed of polyphosphate and longer life
- Housing converts to ScaleKleen® Feeder for periodic delimitings
- SR-X Scale Inhibitor Feeder System includes SR-X 10.0" [25.4 cm] Housing (black) with one (1) SS-IMF Cartridge and spacer
- Everpure SS-XL ScaleStick® Cartridge (sold separately) offers up to four (4) times the scale reduction capacity of the SS-IMF Cartridge for locations with increased scale control needs; fits most standard 10.0" [25.4] cm housings and all current SR-X Housings

## REDUCE SCALE TO MINIMIZE MAINTENANCE COSTS

- Scale buildup can increase energy usage and equipment maintenance costs while shortening equipment life
- Economical Pentair® Everpure® brand solutions are available to control this buildup and periodically remove any accumulation

### EVERPURE DELIMING/SCALE REMOVAL SYSTEM

HFC-10

HFC-10 plumbs into hot water line providing easy deliming of equipment. Uses ScaleKleen® Scale Remover. Includes high temperature 10.0" [25.4 cm] housing, 2.2 lbs. [1.0 kgs.] ScaleKleen Scale Remover, hardness test strip and dip tube.

### GENERAL SANITIZING

The Everpure JT Cartridge is the preferred way to introduce ScaleKleen Scale Remover or other sanitizing agents, such as bleach, into water-using appliances through an existing Everpure filter head.

## DELIMING USING EVERPURE SCALEKLEEN AND EVERPURE JT CARTRIDGE

1. Turn off inlet water supply, remove and discard existing filter cartridge.
2. Remove TOP PLUG from JT can and pour in ScaleKleen.
  - **Small steam ovens** use 2.2 lbs. [1.0 kgs.]
  - **Large steam ovens** (>10 kW or >100,000 BTU) use two (2) JT cans
  - **Coffee makers** brewing one pot (1/2 gallon) per cycle, use one (1) 2.2 lbs. [1.0 kgs.] package
3. REPLACE TOP PLUG, insert the JT cartridge(s) into the head assembly, and turn the inlet water on.
4. When the steps below are complete, replace the JT can with a new Everpure filter.

#### STEAM Application:

1. Flush JT until 1 gallon of water has passed through. (Note: a flow rate of 2 gpm [7.57 Lpm] equals two (2) minutes).

2. Turn on steam oven. After it reaches operating temperature, allow **30 minutes** for ScaleKleen to remove scale. Turn off steam oven.
3. Blowdown the boiler until pH of the effluent is within one (1) pH unit of the incoming (influent) water.

#### COFFEE Application:

1. Remove filter basket and spray head and dump the coffee grounds. Place spray head in the target coffee pot.
2. Cycle coffeemaker once, vending one (1) pot. Let it sit for **30 minutes**.
3. After 30 minutes, cycle coffeemaker with ten (10) pots of fresh water to flush the ScaleKleen from brewer. Check the pH of the hot water – if it's within one (1) pH unit of the incoming cold water, the ScaleKleen is flushed out.

## EVERPURE® SYSTEMS FOR MULTIPLE APPLICATIONS

- 20.0" [50.8 cm] coarse prefilter
- 1/2 micron precoat filtration by mechanical means with proprietary Micro-Pure® II media†
- SR-X Scale Reduction Feeder featuring ScaleStick®
- Manifold has inlet water shutoff valve, flushing valve, inlet/outlet water pressure gauge(s) and dual outlets

**System sizing guidelines:** Our system sizing guidelines are approximations based on properly installed equipment, average usage at normal operating flow rate and average water conditions. These guidelines are designed to give you approximately six (6) months of use between filter cartridge changes. Variations in equipment usage and/or incoming water conditions can produce different results.

Streamlined appearance; durable construction

Includes inlet water shutoff valve and flushing valve

Pressure gauges included for cartridge change indication; optional low pressure alarm

Outlet for fountain and drinking water applications

Outlet for ice, coffee and steam applications

- Easy to use and maintain
- Provides balanced feed and longer life
- Minimizes maintenance costs
- Protects equipment from scale buildup

- Quick-change feature eliminates sanitization required with drop-in cartridges
- Chlorine, taste & odor, 1/2 micron particulate reduction by mechanical means†, bacteriostatic\*† and turbidity reduction all in a single cartridge!
- Harmful cyst reduction by mechanical means†
- High quality, durable and attractive aluminum construction
- NSF 42 and 53 certifications
- Features Everpure Micro-Pure® II media\*† with antimicrobial protection to enhance product life

## EVERPURE® ENDURANCE® SC HIGH FLOW SYSTEMS

The Endurance SC is Pentair's high flow filtration platform for high volume foodservice operators. This self-cleaning model features smart, flushable, hollow fiber technology that adjusts flush cycle based on water usage.

- Right-sized for high volume operators requiring ingredient quality water
- Ideal for locations that suffer from extreme particulates in water supply
- Municipal-grade hollow-fiber membranes reduce particulates down to 0.025 micron by mechanical means†
- Intelligent controller automates self-cleaning flushes based on actual gallons/litres of water consumed
- Features Everpure SEN Fibredyne™ Fine Filters with proprietary Fibredyne II media for superior contaminant reduction
- NSF listed chlorine reduction capacity allows for once-per-year changeouts of carbon cartridges
- Utilizes the Everpure 2SR-BW Phosphate Cartridge (EV9627-14) for scale reduction
- Compact, wall-mountable design

EV9437-42  
Endurance SC Quad

Self-cleaning membrane makes this system ideal for tap water that has extreme particulate, including ultra-small collidal particles that can clog fine carbon filters.

# EVERPURE® RO SYSTEMS – 15 TO 350 GALLONS [57 TO 1,325 L] PER DAY OF PERMEATE WATER

- For a fresh, clean, pure back of house water source
- Improves equipment life and performance by removing 90%+ of all dissolved solids that cause scale buildup
- Protects against taste- and odor-causing contaminants while removing dirt, particulates and dissolved minerals
- Reduces limescale buildup that can cause excessive machine downtime and increased maintenance costs
- Reduces energy costs caused by scale buildup on equipment heating elements and boilers
- LVRO is a low volume RO that provides a more environmentally friendly solution
- CC models introduce a small amount of hardness minerals back into the treated water

- BL Series systems feature an adjustable blend valve which allows for custom tailoring of the dissolved mineral content in the treated water
- Controlled remineralization using the CC Cartridge, or blending, is desirable for coffee that requires some hardness for proper extraction, and for tea brewing for the proper release of flavonoids

It is highly recommended that a Pentair RO Storage Tank and Pressure Relief Valve Kit are used with all Pentair Reverse Osmosis Systems. See page 45 for more information.

## EVERPURE® CONSERV® RO-75S HIGH EFFICIENCY RO SYSTEM

The innovative Conserv High Efficiency Reverse Osmosis System provides high quality water for combi ovens, steamers and proofers. The system delivers the right balance of minerals for optimal scale and corrosion inhibition resulting in extended equipment life, reduced downtime due to costly maintenance and repair.

- Up to 50% water savings over conventional RO systems producing 50 GPD of water
- Features an on-board storage tank and a blending valve to provide the right balance of blended water for steam applications
- 95%+ reduction in scale-causing dissolved solids
- Compact design permits wall mount, countertop or under counter installation
- Helps equipment heating surfaces maintain peak transfer efficiency, reducing cycle times and energy consumption

## EVERPURE CONSERV RO-75E HIGH EFFICIENCY RO SYSTEM

This version of Conserv High Efficiency Reverse Osmosis System provides premium quality water for espresso machines and more. Pentair Everpure's latest water treatment technology provides superior protection against off-taste and odor while removing particulates and dissolved solids that can foul lines and cause scale buildup.

- Permits tailored blending of incoming water to produce the ideal mineral content for better-tasting espresso and coffee
- Up to 50% water savings over conventional RO systems
- Blending valve adjusts right balance of minerals for optimal scale and corrosion inhibition resulting in extended equipment life, reduced downtime due to costly maintenance and repair
- Adaptable for ice applications via prefilter inlet
- Includes accessory tank port for added capacity during periods of peak demand
- Compact design permits wall mount, counter-top or under counter installation

## EVERPURE® MRS-600HE AND MRS-600HE-II REVERSE OSMOSIS SYSTEMS

High output/high efficiency configurable reverse osmosis systems rated at 600 gallons [2,271 L] per day nominal. Depending on model selected, delivers reverse osmosis and/or

blended filtered water for multiple foodservice applications. For use with coffee brewers, espresso machines, steamers, combi ovens and ice machines. Also ideal for specialty coffee.

### MRS-600HE HIGH EFFICIENCY REVERSE OSMOSIS (RO) SYSTEM

**Featuring dual headed pump and integrated 6.0 gallon [22.7 L] tank**

MRS-600HE requires the addition of a remote submicron sediment and carbon filtration system. The Everpure Coldrink® Series, CB20-302E or CB20-312E are suitable pretreatment systems.

### MRS-600HE-II HIGH EFFICIENCY REVERSE OSMOSIS (RO) SYSTEM

**Featuring on-board filtration and inlet and permeate boost pumps**

MRS-600HE-II includes submicron sediment and carbon filtration, but does not include a storage tank. Contact Pentair® Everpure for assistance when configuring a complete system package.

**MRS-600HE Without Cover**

Dual-output design provides both low TDS water (pure RO water) and blended water (filtered tap water and RO water mix)

6-gallon total capacity RO water storage tank provides ample reserve volume for instantaneous demands

Unique, dual-headed pump boosts output and overall system efficiency

2SR-BW Cartridge inhibits scale formation, extending the life of the MR-600 RO Cartridge

MR-600 RO Cartridge delivers two (2) times the daily production volume of conventional RO membranes of similar size

**MRS-600HE-II Without Cover**

Permeate boost pump reduces back pressure on RO membrane and maximizes system output and efficiency

Microprocessor-based control with digital display provides system status and operator interface

Inlet boost pump increases supply pressure for consistent water production

Triple bank of prefiltration cartridges reduces sediment, oxidizers and scale, offering maximum RO module protection

Dual post-filtration cartridges remove sediments, taste, odors and other undesirable water attributes prior to exiting the system

## WHEN TO CONSIDER EVERPURE REVERSE OSMOSIS

For any foodservice operation in need of water treatment due to high levels of Total Dissolved Solids (TDS) in its water. A reverse osmosis system is an effective – yet often costly – necessity. In fact, reverse osmosis is by far the most practical and effective solution for removing TDS from water and consistently achieving high quality ingredient water.

### How does one know if the TDS content in the water is high enough to require a reverse osmosis (RO) solution?

- It imparts objectionable taste
- It prevents conventional forms of scale control from providing acceptable results
- It negatively impacts the desired recipe
- Or simply test the water – RO should be considered when TDS levels in excess of 300 ppm are present

Note: Water production is dependent upon incoming water temperature and line pressure. Additional equipment such as tempering valves or booster pumps may be required for proper operation. Consult your Pentair Everpure representative for assistance in correct system selection and design.

## Water Savings per Gallon of RO Water Used

### Conventional RO

For every 1 gallon of RO water used, 4 gallons of water goes to drain as waste.

### Everpure MRS-600 Systems

For every 1 gallon of RO water used, 1/4 gallon of water goes to drain as waste.

## REVERSE OSMOSIS (RO) ACCESSORIES

Our high performance, high value Pentair® RO Storage Tanks are specifically designed for foodservice and light commercial reverse osmosis applications. These small vessels offer distinct advantages over competing tanks via their 100% seamless, composite construction, and the ability to discharge in any position.

Both Pentair RO Storage Tanks and Pressure Relief Valve (PRV) Kits are an important part of a reverse osmosis system installation. Storage tanks ensure there is an ample supply of treated water to meet the demands of a specific application. PRV kits ensure that the water pressure after the tank remains within the ideal operating range. These kits are often necessary because the storage tank's water pressure is generally higher than that of an acceptable operating pressure for foodservice equipment.

Tanks do not include fittings and tubing.

## BENEFITS OF THE EVERPURE® ULTRAFILTRATION SYSTEM

Ultrafiltration membranes provide high capacity flow rates while allowing effective reduction of contaminants such as particles, bacteria, viruses and cysts by mechanical means.\* Suitable for poor quality or high turbidity areas that face frequent cartridge change-outs or short-life issues.

- High quality ingredient water
- Bacteria and virus reduction by mechanical means\*
- Automatic, self-cleaning, high-capacity filtration
- Maximized carbon filter life
- Extended cartridge change intervals

## EVERPURE HSD 440P AUTOMATIC SELF-FLUSHING ULTRAFILTER

- Filters particles as small as 0.025 micron by mechanical means\*
- Reduces bacteria and virus by mechanical means\*
- Multi-programmable, self-flushing controller allows for minimal water waste and several year's use between replacement of hollow fiber cartridge
- Hollow fiber configuration traps fine particles and permits accumulated materials to be flushed away periodically
- Idea for high volume applications and/or high turbidity areas
- Low maintenance

## EVERPURE® WATER SOFTENER SYSTEMS

Pentair® Everpure offers a full line of commercial point-of-entry water softeners for small food and beverage operations up to large retail superstores. System capacities include:

- Hardness removal: 30,000 to 750,000 grains
- Flow rate: 10.0 to 165.0 gpm [37.9 to 624.6 Lpm]

### EVERPURE WS-30E SERIES WATER SOFTENER

- Advanced, user-friendly controls incorporate time-tested, hydraulically-balanced piston, seal and spacer design to pilot service flow and regeneration
- Fiberglass-reinforced resin vessels with NSF®-approved polyethylene liners eliminate worries about corrosion
- Pentair Fleck® 5600-SXT meter-initiated control valve monitors water usage and minimizes salt, water and electrical costs
- Single-tank design for simplicity, economy and space savings
- Large capacity brine tank maximizes time between salt replenishments

### ADDITIONAL SOFTENING SYSTEMS AVAILABLE FROM PENTAIR

#### Feature control valves from an industry leader

Everpure systems feature Pentair Fleck® brand control valves – recognized worldwide for reliability and performance.

- Designed for continuous operation and test-proven to deliver up to 27 years of uninterrupted daily use
- Self-cleaning, coated piston prevents buildup of incoming hard water

#### Tested-tough tanks by Pentair

- NSF-certified, fiberglass-reinforced pressure tank endures up to 250,000 cycles without leaking
- Non-toxic polyethylene vessel liner and brine tank resist corrosion and stress cracks

#### All-around savings

Precision flow meter efficiently regenerates the system, saving on salt, water and the cost of electricity.

#### Superior service and support

Our complete package of professional services includes sizing, installation, servicing and technical support.

#### Never without softened water

Available in duplex alternating configurations which incorporate an additional tank for a never-ending supply of soft water.

#### Five (5) years worry-free

A complete system has a five-year limited warranty to withstand day-to-day operation under normal use and service.

Visit  
[foodservice.pentair.com](http://foodservice.pentair.com)  
 for more softener  
 product information.

High levels of dissolved (ferrous) iron and manganese (>5 ppm) can damage your resin. To prolong the lifespan of your water softener when these materials are excessively present, Pentair Everpure recommends a prefilter. Also, use salt that contains an iron-fighting additive or use a resin cleaner on a regular basis.

## EVERPURE® BOWL SOFTENING

## EVERPURE SIMPLIFLOW® WATER MANAGEMENT SYSTEMS

The Everpure SimpliFlow System rescues your back room from the typical tangled mess of water lines that worsen as your water needs grow and change. This adaptable, simple-to-use beverage line management system provides quick and easy identification of water lines, and helps you organize and manage fluid movement throughout your store.

- Organize back room water lines
- Manage water by water quality profiles and application
- Easy to install
- Compact footprint
- Easily identify water lines using labels included with each manifold
- Multiple connection options available
- Inlet can be oriented from left, right or bottom of manifold
- Flexible manifold can be rotated 90 degrees within bracket to allow for elbow connections
- Reduce service expense

## FLOOD PROTECTION

### ELTEK® WATER BLOCK

- Overflow safety device for coffee brewers, coolers, chillers, heaters, vending machines, ice machines and more
- Automatically shuts off if preset volume is exceeded
- Automatically resets if water volume preset is not exceeded
- Ten-position dial sets maximum flow volume
- No external energy source required
- Not recommended for reverse osmosis (RO) or ice flaker installation as an RO system by nature can produce permeate water for long periods of time which will unnecessarily trip the Water Block
- Water Block Reset Device is optional for use to manually reset device

## EVERPURE® MANIFOLD SYSTEM CONFIGURATIONS ORDERING GUIDE

Everpure Manifolds by Pentair® are available in a variety of preconfigured setups. You are able to mix and match between our wide range of cartridges and various manifolds to create

a Single, Twin, Triple or Quad System that meets your specific needs. Follow these four quick and easy steps to determine the best fit for your application.

### STEP ONE: Identify your application and corresponding filter cartridge.

At right are some of the typical Everpure applications and corresponding filter cartridge options. For additional assistance, please contact Pentair Everpure Technical Service at 800.942.1153 or [servicespecialist@pentair.com](mailto:servicespecialist@pentair.com).

APPLICATION	FOUNTAIN/COMBINATION	ICE	COFFEE	ESPRESSO
Everpure Filter Cartridge Options	MC <sup>2</sup>	i2000 <sup>2</sup>	BH <sup>2</sup>	ES06
	XC <sup>2</sup>	i4000 <sup>2</sup>	4H	ES07

	4FC / 7FC	4FC-S / 7FC-S	4FC-S / 7FC-S	—

### STEP TWO: Select your flow rate or capacity requirements.

#### CONFIGURED SYSTEM FLOW RATES

Determine the flow rate you require and then match to the head and cartridge. Examples:

- If you need a flow rate of 1.67 gallons per minute (gpm) [6.32 Lpm], you can use a single head with one (1) filter cartridge as long as the filter cartridge is designed for 1.67 gpm (such as the Everpure MC<sup>2</sup>) or greater.
- If you need a flow rate of 3 gpm [11.36 Lpm], you will need a twin head with two (2) filter cartridges as long as the total flow

rate of the two (2) cartridges equals or is greater than 3. To get a 3 total flow rate, you could use two (2) Everpure MC<sup>2</sup> Cartridges (total flow rate 3.34).

- If you need a flow rate of 1 gpm [3.79 Lpm], but the filter cartridge you require is only 0.50 gpm [1.89 Lpm] (such as the Everpure BH<sup>2</sup> Cartridge), then you would need two (2) cartridges in a twin head.

		TYPICAL EVERPURE CARTRIDGE FLOW RATES IN GPM [LPM]

# EVERPURE® MANIFOLD SYSTEM CONFIGURATIONS ORDERING GUIDE (cont'd.)

## STEP THREE: Determine if you need prefiltration or postfiltration.

### WHEN DO I NEED PREFILTRATION?

- Prefiltration is always recommended to ensure you receive the best performance from your Pentair® Everpure filtration system. But in areas where there is little concern around suspended solids, turbidity or particulates, you may choose to opt for a system without a prefilter.

### WHEN DO I NEED POSTFILTRATION?

- Postfiltration is designed to reduce the likelihood of scale buildup. You should consider postfiltration any time your system is delivering water to more than one application. Postfiltration is highly recommended when you are running pieces of equipment that either heat water (such as coffee or espresso), or chill water (such as an ice machine, or drinking water and fountain drink equipment).

Pick the desired number of cartridges/heads.

**Prefiltration**  
(Available in 10.0" [25.4 cm] or 20.0" [50.8 cm] system sizes)

1 (Single) 2 (Twin) 3 (Triple) 4 (Quad)\*  
\*Not shown.

**Postfiltration**  
(Scale prevention systems available in multiple sizes)

Examples:

Quad system only (no prefilter or postfilter)

## STEP FOUR: Make your final product selection.

**Twin Series Head;  
Series Plumbed**

**QC7I DIO Manifold**

**A series head:**

- Water flows through each filter in a linear fashion so the total flow is limited to the filter with the lowest flow rate and capacity

**DIO manifold:**

- Provides two water qualities. The first outlet is from two (2) filter cartridges in parallel, the second outlet is from three (3) filter cartridges, see page 22 for example.

## EVERPURE ACCESSORIES

### ADJUSTABLE THERMOSTATIC MIXING VALVE (TMV) FOR RO SYSTEMS

- Controls the blending of hot and cold water producing a controlled (tempered) outlet water temperature
- Typically used in cold climates to regulate the water temperature to an RO system, which in turn allows the RO to maintain its rated output at 77°F [25°C]

## FILTRATION BENEFITS FOR OPERATORS

### A few of the ways that water filtration benefits foodservice operations:

#### Beverage quality

- **Coffee:** better extraction for less bitterness or astringency
- **Espresso:** smooth and rich flavor, perfect crema
- **Iced Tea:** clean taste, no cloudiness
- **Drinking Water:** no chlorine taste or smell, improved safety
- **Fountain Beverage:** better fizz and flavor
- **Ice:** hard, crystal-clear cubes
- **Brewed Tea:** better extraction of flavor, perfect color

#### Less downtime and longer life for foodservice equipment

- **Coffee Brewers:** reduced scale on heating elements and fewer issues with valves, solenoids and reservoirs
- **Espresso Brewers:** reduced scale on heating elements, reduced stress cracking on boilers, better pressure
- **Fountain Beverage Systems:** better water pressure, improved gas pump efficiency

- **Ice Machines:** reduced scale and downtime due to freeze-up and bridging
- **Steam and Combi Ovens:** less limescale, less corrosion, and better steam consistency
- **Warewashing:** spot-free dishes and glassware, better energy efficiency

#### Sustainability

- **Energy Savings:** hard water and the resulting scale can reduce energy efficiency in equipment by 50% or more, costing over \$1,000 annually in higher utility bills
- **Water Waste:** high efficiency reverse osmosis from Pentair Everpure can save an operator over 100,000 gallons annually from going to drain as waste water versus conventional RO systems
- **Reduced Waste:** eliminating bottled water in favor of on-site filtered tap water can reduce the 22 billion water bottles going to landfills today

### The Risk of Counterfeit Filter Cartridges

- Everpure® heads and cartridges are certified as systems by NSF. Using counterfeit filters results in a loss of this valuable industry certification.
- Without NSF certification, there is no assurance of performance and quality could be suspect.
- For over 80 years, Pentair® Everpure has been providing quality filtration products for customers around the world, and today we're a leading brand of water treatment for foodservice. We're trusted by many of the world's largest foodservice and specialty beverage chains, as well as hundreds of thousands of independent operators.
- The majority of our cartridges are certified by NSF. This provides assurance that the system has been independently evaluated to confirm its performance.
- Certified Everpure filtration products have been submitted for testing under NSF/ANSI Standards 53 and 42.
- The certification is displayed on the cartridge's label along with the applicable NSF claims.

For further information on NSF certification, please contact Technical Service at 800.942.1153/630.307.3000 or consult the NSF website, [www.nsf.org](http://www.nsf.org).

#### The importance of NSF Certification

There are important reasons to look for NSF Certification when purchasing a water filter:

- **Performance claims may be based on internal testing only.** Do you have access to all the testing procedures used? Was testing done to industry standards?
- **Sometimes stated capacities are misleading** because they may be based on only chemical (chlorine) reduction and don't take particulates into consideration. Particulates have an important role in how long a filter will last. Most often, a filter plugs from dirt before the chemical capacity is used up.
- **In capacity claims, it's not always clear what percentage of chemical contaminants are actually reduced.** For example, if there is only a 50% reduction in chlorine then higher capacities can be claimed. But is removal of only half the chlorine acceptable for quality beverages?

#### NSF Certification ensures that:

- The contaminant reduction claims certified are true and accurate.
- The materials of construction do not add anything unwanted to the water such as lead.
- The system is structurally sound.
- Advertising claims are true and accurate.

#### What is NSF?

- Founded in 1944, NSF International is a not-for-profit organization that provides public health and safety risk management solutions to companies, governments and consumers around the world.
- Its main business is to bring together experts in public health, manufacturing, and sanitation from government, industry, academia and the public to develop and administer performance standards for products which have some impact on sanitation and public health.
- NSF maintains state-of-the-art laboratories where products can be tested according to set standards.

#### For water filters, look for these certifications:\*

- **NSF/ANSI Standard 42: Aesthetic Effects**  
For water treatment systems designed to reduce specific aesthetic or non-health-related contaminants (chlorine, taste and odor, and particulates).
- **NSF/ANSI Standard 53: Health Effects**  
For water treatment systems designed to reduce specific health-related contaminants, such as *Cryptosporidium*, *Giardia*, lead, volatile organic chemicals (VOCs), MTBE (methyl tertiary-butyl ether).

\*It's important to read the small print when evaluating a product certification. Within Standards 42 and 53 there are different classes and contaminant removals to consider. Even though a filter is certified for a standard, it may not be certified for all of the reductions possible within that standard.
